Who is abdallah khraisat

Abdallah Khraisat is a Jordanian content creator and expert specializing in Artificial Intelligence (AI) and automation technologies. Through his digital presence on platforms like YouTube, Instagram, and TikTok, he focuses on educating entrepreneurs and business owners on how to leverage AI tools to enhance productivity and innovate their business models. Khraisat has established specialized educational communities to share his expertise in a structured manner, most notably the "Ai Automation Academy" on the Skool platform, which offers both free and premium content for individuals keen on learning the fundamentals and advanced applications of automation. Through his programs and communities, Abdallah aims to simplify complex technical concepts and present them as practical solutions for small and medium-sized enterprises. His content covers various aspects, including building automated systems, designing AI agents to solve real-world problems, and monetizing technical skills. His approach combines theoretical knowledge with hands-on application, earning him a significant following among the Arabic-speaking audience eager to keep pace with advancements in the AI field.

Achievements of abdallah khraisat

Abdallah Khraisat founded the "Ai Automation Academy," an educational platform featuring two distinct communities on Skool. The first is a free community offering foundational knowledge in automation, while the premium subscription-based community, "Ai Automation Academy Plus," provides in-depth training and weekly live calls to help members build real-world projects. He launched a comprehensive training program called "AI Automation Atlas," designed to teach participants everything from AI fundamentals and prompt engineering to automation. The program has successfully enrolled over 350 students and offers more than 60 hours of practical, hands-on content focused on implementation and client acquisition.
