Who is Abdulhadi Jfri

Dr. Abdulhadi Jfri is a distinguished Saudi Consultant Dermatologist, cosmetic surgeon, and Assistant Professor at King Saud bin Abdulaziz University for Health Sciences (KSAU-HS). He uniquely combines high-level academic research with clinical excellence, serving as a consultant at the National Guard Hospital and operating a private practice in Jeddah, Riyadh, and Dubai. Dr. Jfri is double board-certified in dermatology by both the Royal College of Physicians and Surgeons of Canada and the American Board of Dermatology. His extensive training includes a dermatology residency at McGill University in Canada, where he also earned a Master of Science in Experimental Medicine, specializing in epidemiology and biostatistics. Dr. Jfri pursued two prestigious fellowships in the United States: one in Advanced Surgical Dermatology at the Icahn School of Medicine at Mount Sinai in New York, and another in Complex Medical Dermatology at Harvard Medical School. Notably, he was the first non-US international medical graduate to complete the Complex Medical Dermatology fellowship at Harvard. His practice focuses on cutting-edge dermatologic therapies, evidence-based medicine, and advanced cosmetic procedures. He is a certified trainer for injectables like Botox, fillers, and collagen biostimulators, and is an expert in advanced laser and energy-based devices.

Achievements of Abdulhadi Jfri

Dr. Abdulhadi Jfri achieved a landmark accomplishment by becoming the first Saudi and non-US international medical graduate to complete the prestigious Complex Medical Dermatology fellowship at Harvard Medical School, one of the most competitive fellowship programs globally. In recognition of his academic and teaching contributions, he received the Best Dermatology Resident Teaching Award from the Canadian Dermatology Association in 2021. The same year, he was also honored with the Best Young Researcher Award from McGill University, highlighting his excellence in scientific investigation. Dr. Jfri was awarded the Impact Factor 100 Award by the Canadian Dermatology Association for his significant contributions to dermatological literature through high-impact publications. He has authored over 95 publications and serves as an editor and reviewer for several esteemed dermatology journals.
