Who is Ahmad Nokari

Ahmad Nokari is a Lebanese filmmaker and content creator known for his focus on profound human stories and emotionally resonant social experiments. As the Co-Founder and Creative Director of the creative agency "forzza" since November 2013, Ahmad leads a team dedicated to brand identity and creative solutions. Based in Beirut, the agency develops visually impactful communication strategies and powerful messaging for its clients. Beyond his agency work, Ahmad dedicates his time to producing impactful visual content on his social media platforms. He shares short films and documentaries that explore philosophical and social themes, often highlighting the resilience of the human spirit in the face of adversity. He is also the founder of "forzza campers," a venture that merges his passion for nature and travel with his expertise in design and creativity. Nokari's body of work reflects a strong commitment to authentic storytelling that inspires reflection and engages audiences on a deeper level.

Achievements of Ahmad Nokari

Ahmad Nokari co-founded the Beirut-based creative agency "forzza." For over a decade since its establishment in 2013, the agency has been providing brand-building services and creative strategies, helping companies develop their visual identity and market voice through innovative design and communication solutions. Ahmad initiated and produced "The Story of a Flag," a personal film project that showcases his artistic vision and narrative capabilities. This work highlights his interest in themes of humanity and identity and demonstrates his skills in independent filmmaking and direction. He founded "forzza campers," a venture that combines functional design with a passion for adventure. Through this project, Nokari oversees the design and outfitting of high-specification camper vans, offering a unique experience for travel and nature enthusiasts in Lebanon and the region.
