Who is Andrew Wadid

Andrew Wadid is a prominent Egyptian tech content creator and media personality specializing in technology and modern innovations. Before becoming a well-known face in Arab tech media, Wadid began his career as an architect after graduating from the American University in Cairo. However, his profound passion for technology led him to a career change, where he found content creation to be the ideal platform for sharing his interest in the latest smart devices and innovations in a simple and engaging manner. Wadid produces his content entirely in Arabic, aiming to simplify complex technological concepts for audiences across the Middle East and North Africa. His work covers a wide array of topics, including reviews of smartphones and cameras, electric vehicles (EVs), artificial intelligence applications, and travel technology. Through his various platforms on YouTube, TikTok, and Instagram, he has successfully built a large and interactive community that appreciates his fast-paced and entertaining style. In addition to content creation, Andrew participates as a speaker at tech events, such as the RiseUp Summit, and frequently appears as a technology expert on television programs like "Al Qahera Al Youm" to discuss the latest technological advancements.

Achievements of Andrew Wadid

Andrew Wadid has successfully established himself as an influential tech content creator in the region, leading to collaborations with major global brands such as NVIDIA, ASUS, and Sony. He was selected to participate in exclusive corporate events like "NVIDIA Studio Nights," placing him among the elite creators shaping the conversation around technology in the Middle East. Wadid maintains a strong media presence, regularly appearing as a technology expert on the television show "Al Qahera Al Youm" on Alfa TV Network and featuring in various podcasts. He is also a speaker and Master of Ceremonies at prominent tech events, including the RiseUp Summit 2025, where he shares his insights on topics like the power of storytelling in technology.
