Who is Dr. Mishal Almebayadh

Dr. Mishal Almebayadh is a Saudi consultant specializing in dermatology, cosmetic procedures, and laser therapy, with expertise in both medical and aesthetic dermatology. His practice focuses on utilizing advanced technologies, including laser treatments, to address a wide range of skin conditions in both adult and pediatric patients. In addition to his clinical work, Dr. Almebayadh is actively involved in public health education through social media and traditional media outlets. He provides educational content on skin health and disease prevention, such as his discussion on skin cancer during an appearance on Alarabiya FM. He is also a contributor to academic and research fields, having co-authored significant publications. His work includes contributions to "The Saudi National Policy and Protocol for Epidermolysis Bullosa," research on laser treatments in pediatric dermatology, and studies on drug-induced conditions like Subacute Cutaneous Lupus Erythematosus. These contributions highlight his commitment to advancing clinical practice and promoting health awareness.

Achievements of Dr. Mishal Almebayadh

Dr. Almebayadh was an expert contributor to the development of "The Saudi National Policy and Protocol for Epidermolysis Bullosa." This significant national guideline aims to standardize care for patients with this rare and serious genetic skin disorder across Saudi Arabia, reflecting his expertise in genetic dermatological conditions. He has contributed to international scientific literature by publishing in peer-reviewed medical journals. His notable works include research on "Subacute Cutaneous Lupus Erythematosus Induced and Exacerbated by Proton Pump Inhibitors," published in the journal **Dermatology**, and an article on "Laser treatments in pediatric dermatology," showcasing his expertise in specialized fields.
