Who is Dr. Saad Altalhab

Professor Dr. Saad Altalhab is a prominent academic and medical figure in Saudi Arabia, combining academic leadership with advanced clinical expertise. He serves as the Dean of the College of Medicine at Imam Mohammad ibn Saud Islamic University (IMISU), where he leads educational and research initiatives to train the next generation of physicians. Alongside his academic responsibilities, he is a distinguished Professor and Consultant in Dermatology, Cosmetic Medicine, and Laser Surgery, providing his expertise at Jova Clinics in Riyadh. Dr. Altalhab holds both the Saudi Board and Arab Board certifications in Dermatology, the highest regional qualifications, reflecting his profound knowledge and competence. His clinical practice focuses on complex dermatological conditions, with a special interest in vitiligo. He is also highly skilled in non-surgical cosmetic procedures such as fillers and Botox, and utilizes the latest laser technologies. Dr. Altalhab is an active researcher with numerous internationally peer-reviewed publications, particularly in the field of vitiligo treatment. He is a regular speaker at national and international medical conferences and contributes to public health education through various platforms, including television interviews and medical podcasts.

Achievements of Dr. Saad Altalhab

Professor Dr. Saad Altalhab holds the prestigious position of Dean of the College of Medicine at Imam Mohammad ibn Saud Islamic University. This senior leadership role highlights his distinguished academic career and his contributions to advancing medical education in Saudi Arabia. Dr. Altalhab has earned dual board certifications, holding both the Saudi Board and the Arab Board in Dermatology. This dual qualification is a significant professional achievement, signifying his adherence to the highest clinical and scientific standards in his specialty at both national and regional levels. As an accomplished researcher, Dr. Altalhab has an extensive record of scientific papers published in reputable international journals. His research primarily focuses on vitiligo, and his studies have significantly contributed to the understanding and treatment of the condition, establishing him as a key scientific voice in the field.
