Who is Dr. Sami Assani

Dr. Sami Assani is a Syrian orthodontist specializing in dentofacial orthopedics, with extensive experience in the latest digital technologies for cosmetic dentistry, particularly in the field of clear aligners. He currently practices at the prestigious Vitrin Clinic in Istanbul, Turkey, where he provides patients with advanced solutions for smile correction and achieving well-aligned teeth. Dr. Assani focuses on delivering a comfortable and effective treatment experience, utilizing modern techniques that include digital smile design, dental implants, and comprehensive smile makeovers. Dr. Assani possesses a distinguished academic background and is currently pursuing a Doctoral Program in Orthodontics at Medipol University in Istanbul. He holds two master's degrees: one in Orthodontics from Medipol University (2019-2021) and another in General Dentistry from Okan University (2021-2023). He began his educational journey with a Bachelor of Dental Surgery (BDS) from Al-Farabi University in Jeddah. Through his active social media presence, he shares his knowledge and expertise with the public, offering advice on oral health and the latest advancements in cosmetic dentistry.

Achievements of Dr. Sami Assani

Dr. Sami Assani serves as a Specialist Orthodontist at Vitrin Clinic in Istanbul, a medical center recognized for its advanced dental services. His position on their team highlights his status as a trusted expert in his field. Dr. Assani continues to deepen his academic expertise through his enrollment in the Doctoral Program in Orthodontics at Medipol University, which he began in 2024. This commitment places him at the forefront of the specialty, staying abreast of the latest research and techniques.
