Who is Fahed Quttainah

Fahed Quttainah is a tech entrepreneur and innovator specializing in artificial intelligence and emerging technologies. Renowned for his passion for digital transformation, he creates smart solutions that drive business efficiency and empower individuals to leverage technology in creative, impactful ways. Fahed has founded multiple ventures at the intersection of AI and strategic design, and continues to develop future-focused tools that advance digital transformation across the region and beyond.

Achievements of Fahed Quttainah

Fahed Quttainah is recognized as a leading figure in the Arab world in cryptocurrency and artificial intelligence. He founded two pioneering educational platforms: Cryptocurrencies Academy and the AI Academy, empowering Arabic speakers to understand and utilize the latest digital technologies. Through Cryptocurrencies Academy, Fahed delivered comprehensive training programs covering blockchain fundamentals, crypto trading, portfolio management, and market analysis—raising financial and technical literacy among Arab traders and investors. The academy has become a trusted educational reference for those seeking to enter the crypto world with professionalism and security, offering accessible content that blends practical expertise with academic insight. In parallel, he launched the AI Academy—one of the first Arabic platforms dedicated to practical AI education across business, marketing, programming, and analytics. The academy focuses on equipping learners to use cutting-edge AI tools such as generative models and intelligent automation, simplifying complex concepts for all levels. Through these two academies, Fahed Quttainah has bridged modern technology with real-world application, leaving a lasting mark on Arabic educational content in the digital future.
