Who is Mohamad Nour

Mohamed Nour Kasem is a Syrian software engineer and technical content creator specializing in full-stack development. He possesses extensive experience in building web applications using a diverse technology stack that includes .NET Core, Angular, SQL Server, and MongoDB. Known in the Arab tech community by his brand "07tech0," Mohamed creates educational content across platforms like YouTube, Telegram, and Instagram. His content focuses on simplifying programming concepts, explaining web development, and providing career guidance for both new and experienced developers, covering topics such as job hunting strategies, code reviews, and efficient use of development tools. Through his work, Mohamed combines deep technical skills with a passion for knowledge sharing, making him a go-to resource for many young programmers in the Arab world. He aims to empower developers with the tools and knowledge necessary to succeed in the tech industry.

Achievements of Mohamad Nour

One of Mohamed Nour's significant professional achievements is his role in developing the "Open Data Mining Portal" for the Fujairah Natural Resources Corporation (FNRC). This project is a specialized digital platform designed to showcase categorized local and global mining datasets, promoting transparency and supporting economic development and investment opportunities in Fujairah's mining sector. In content creation, Mohamed Nour has successfully built an influential presence under the brand "07tech0" across multiple platforms. Through his YouTube channel, he provides practical tutorials and workshops on programming, along with valuable career advice that has helped thousands of followers advance their careers in software development.
