Who is Mohamed Dorgham

Mohamed Dorgham is an Egyptian AI engineer and entrepreneur who founded "Dorgham AI" with a mission to empower businesses and individuals in the Arab world by leveraging artificial intelligence tools. His work focuses on providing technical consulting to companies to integrate AI solutions into their operations, alongside creating specialized and simplified educational content across social media platforms to enhance individual skills in the field. Before founding his company in March 2024, Dorgham gained hands-on experience in AI research and development. He served as a Senior AI R&D Engineer at "RDI" from September 2021 to March 2024. He also worked as an AI Engineer at "SEKEL" between 2020 and 2021, and as a Machine Learning Engineer at "X-Team" during 2020. Through his content, which includes his podcast "Kalam Mo'alab," he aims to explain complex concepts like prompt engineering and generative AI applications to a broad audience.

Achievements of Mohamed Dorgham

Mohamed Dorgham founded "Dorgham AI" in 2024, a specialized consultancy and training platform for businesses and individuals in the MENA region. The company aims to bridge the knowledge gap and facilitate the adoption of AI technologies. He has successfully built a strong presence as an educational content creator in the field of AI in Arabic. Through his YouTube, Instagram, and TikTok channels, he provides simplified explanations of the latest AI tools and techniques, contributing to technological literacy among a wide Arab-speaking audience. During his tenure as a Senior AI R&D Engineer at RDI, Dorgham contributed to the development and implementation of advanced artificial intelligence projects. This role provided him with deep technical expertise in building and applying intelligent models and machine learning solutions.
