Who is Mohamed Saber

Mohamed Saber is an Egyptian tech content creator and expert focused on simplifying advanced technology, particularly artificial intelligence tools, for an Arabic-speaking audience. Through his YouTube channel and other digital platforms, he provides practical tutorials on a wide range of digital applications, strategies for online income generation, and the latest developments in the tech world. His content is known for its clear and direct style, making him a go-to resource for many followers looking to enhance their digital skills. In addition to his work as a content creator, Mohamed Saber has established himself as an expert and consultant in IT and cybercrime. He has appeared on numerous television programs on Egyptian channels such as Nile News and Hya TV, where he offers analysis and insights on topics like data security, digital blackmail, and cybersecurity. In these appearances, he is sometimes identified as a lawyer and specialized researcher in the field. These media engagements have solidified his status as an expert voice in raising awareness about digital risks and how to address them legally and technically. In April 2026, Saber made headlines after being arrested by Egyptian authorities for publishing a video that allegedly explained how to evade surveillance cameras. According to reports, Saber admitted his motive was to increase viewership and that he had sourced the video's information from AI applications without verifying its accuracy. Legal proceedings were initiated against him.

Achievements of Mohamed Saber

Mohamed Saber has built a strong, multi-platform educational presence, including an influential YouTube channel and a blog (s-m2020.com), which have become key resources for Arabic tech content, especially in the realm of artificial intelligence and digital tools. He has gained recognition as a go-to expert in IT and cybercrime, regularly being featured as a commentator and analyst on prominent Egyptian media outlets. His appearances to provide insight on digital security and related legislation reflect established trust in his expertise.
