Who is Muhammad Al-Khatib

Muhammad Al-Khatib is a Jordanian psychologist with extensive experience in counseling and therapy for children and adolescents, specializing in the diagnosis and treatment of Attention-Deficit/Hyperactivity Disorder (ADHD). He began his professional career after graduating from the University of Jordan in 2007, serving as an Educational Counselor for the Jordanian Ministry of Education in Irbid for eight years, from September 2007 to September 2015. During this time, he gained practical experience in providing individual and group counseling to students, addressing behavioral and social issues, and developing comprehensive guidance programs. In September 2015, Al-Khatib transitioned to a role as a psychologist at the Bahraini Foundation for Special Education in Manama, focusing his work on children aged 4 to 15. His responsibilities include conducting psychological assessments, administering specialized tests, creating individual and behavior modification plans, and providing family counseling to support parents. Alongside his clinical work, Al-Khatib is an active content creator on social media platforms like YouTube and Instagram. He produces educational content for parents on managing childhood challenges, understanding ADHD, and implementing effective parenting strategies.

Achievements of Muhammad Al-Khatib

Muhammad Al-Khatib has built a career spanning over 15 years in the mental health and education sectors. He served for eight years as an Educational Counselor with the Jordanian Ministry of Education, where he was responsible for the psychological, social, and educational support of middle and high school students, contributing to the development of various guidance programs. He later joined the Bahraini Foundation for Special Education, specializing in the diagnosis and assessment of ADHD in children. In this role, Al-Khatib has successfully implemented advanced psychological tests, developed individualized treatment and behavioral plans, and provided specialized family counseling sessions, significantly improving the quality of life for many children and their families in the Kingdom of Bahrain.
