Who is Obayda Abu Kweder

Obayda Abu Kweder is a Syrian communications engineer and filmmaker who has established himself as a prominent tech content creator in the Arab world. He specializes in the fields of cybersecurity and artificial intelligence, aiming to simplify complex technical concepts for the general public. Leveraging his background in engineering and filmmaking, Obayda produces high-quality, cinematically-styled videos that make intricate tech topics engaging and easily understandable. Obayda is the founder of the well-known brand "Tech Topia," a name combining "technology" and "utopia" to reflect his vision of creating an ideal space for tech knowledge. Through his YouTube channel and other social media platforms, he provides tutorials, reviews, and practical advice on data protection and digital risk awareness. In addition to his content creation, Obayda Abu Kweder is the Co-Founder of Cyberpedia, a company dedicated to providing cybersecurity solutions, services, and training for individuals and organizations across the Middle East. His professional activities span several key locations, including Dubai, Jordan, and Syria, highlighting his broad regional influence.

Achievements of Obayda Abu Kweder

Obayda Abu Kweder founded "Tech Topia," a trusted and popular source for Arabic-language technical content. Through this platform, he has built a substantial audience across multiple social networks, delivering specialized content on cybersecurity and AI with a unique, simplified, and visually appealing style that has significantly raised digital literacy among his followers. He is the co-founder of Cyberpedia, a comprehensive platform offering cybersecurity solutions, consulting services, and professional training. The company aims to bridge the knowledge and resource gap in the Middle East's cybersecurity landscape, providing advanced educational tools for professionals and enthusiasts, including the launch of the first Arabic library dedicated to cybersecurity books.
