Who is Rama Mubaied

Rama Mubaied is a Syrian software engineer and tech content creator who has emerged as a prominent female voice in the Arabic technology space. Currently based in Sweden, she has built a significant online presence through her channel, "RamaTechTalks," where she simplifies complex programming concepts and explains the latest advancements in artificial intelligence for a broad Arabic-speaking audience. Rama is known for her educational style, which combines technical accuracy with accessible delivery. Her content includes in-depth tutorials, such as her "From Zero to Hero in C++" series, as well as valuable career advice for engineers and students aspiring to enter the tech industry. Her influence extends beyond social media; she is also a recognized media contributor, presenting a dedicated technology segment on the Abu Dhabi TV program "Masa'a Abu Dhabi" (Abu Dhabi Evening), cementing her status as a trusted expert in the field.

Achievements of Rama Mubaied

Rama Mubaied presents a specialized technology segment on "Masa'a Abu Dhabi" (Abu Dhabi Evening), a program broadcast on the prominent Abu Dhabi TV channel. In this role, she analyzes and discusses the latest tech trends, such as Artificial Intelligence and its impact, highlighting her expertise and ability to communicate technical topics to a wide television audience. She successfully established "RamaTechTalks" on YouTube as a trusted educational resource for developers and tech enthusiasts in the Arab world. The channel delivers high-quality, specialized content in Arabic covering advanced programming languages and AI tools, significantly enriching Arabic technical content and bridging a knowledge gap in the field.
