Who is Saif Almakharzeh

Saif Almakharzeh is a Jordanian cybersecurity expert and ethical hacker, renowned as the founder and CEO of Secstien Security, a company he established in 2016. Saif focuses on delivering practical, hands-on cybersecurity training in Arabic, utilizing real-world scenarios rather than traditional academic curricula. The company name, "Secstien," is a portmanteau of "Security" and "Einstein," reflecting his vision of providing innovative education in the field. Through his proprietary platform and global sites like Udemy, Saif has educated over 65,000 students worldwide. His courses cover specialized topics such as advanced penetration testing, web application security, cybercrime investigation, and ethical hacking. Alongside his technical work, Saif is an author of three novels focusing on social engineering and psychological fraud: "Hendaset Al Ghash" (The Engineering of Deceit), "Al Isteghlal bel Tarady" (Exploitation by Consent), and "Fi Jeediha Hablon Min Masad." He actively creates educational content on his YouTube channel, advocating for the empowerment of Arab youth in the cybersecurity freelance market.

Achievements of Saif Almakharzeh

Saif Almakharzeh founded Secstien Security in 2016, a cybersecurity training and consulting company registered in the United States. The company aims to fill the gap in practical Arabic-language content in the field and has successfully trained thousands of students through its specialized courses. He has authored and published three unique novels that explore themes of social engineering and fraud from a psychological and social perspective, reflecting his deep understanding of the human elements in cybersecurity. His literary works are "Hendaset Al Ghash," "Al Isteghlal bel Tarady," and "Fi Jeediha Hablon Min Masad." Almakharzeh has built an influential online educational community, providing training courses to over 65,000 students across multiple platforms. He also offers personalized support to his students, including private sessions and job interview preparation, to empower them to launch their careers in cybersecurity.
